Stagecoach Consultation Response

December 15th 2022

By e-mail only:

[REDACTED]
Development Management Officer – Major Projects
West Oxfordshire District Council,
Elmfield,
New Yatt Road,
Witney,
OXFORDSHIRE
OX28 1PB

Dear Mr. Ditchett,

22/03240/OUT Land South of Burford Road Minster Lovell**1. Background**

We write in response to the public consultation period for the current outline planning application referenced above.

Stagecoach is well aware that the Council cannot currently demonstrate a 5-year supply of deliverable housing sites. This triggers the “presumption in favour of sustainable development” outlined in the National Planning Policy Framework (NPPF), which supports appropriate applications that are submitted outside the plan-led system. It is of great importance to Stagecoach that sites that present credible choices for sustainable transport are recognised by the Council as having substantially greater merit than those to that do not, and that this weighs appropriately in the planning balance, in recognition of the requirements set out in NPPF Chapter 9.

This is also directly relevant to supporting the transition to “net zero”, since transport-related emissions are now the single largest component of domestic emissions and their absolute and proportional contribution is even greater in rural districts like West Oxfordshire.

2. The Location and the availability of sustainable choices

The Local Plan 2031 and the settlement hierarchy recognises that Minster Lovell is a “large village” supporting a variety of local services and facilities. This includes regular public transport services in the form of Stagecoach 233. This service operates from Woodstock, across Witney and then to Minster Lovell via a direct route using Burford Road, as far as the White Hart. Of the two buses per hour that reach this point, one then turns left down Brize Norton Road towards Carterton and the other continues hourly along Burford Road past the site itself. Both limbs arrive at Carterton and in fact the terminating bus inter-operate which means that every departure from Witney ultimately serves the site frontage albeit one via a very indirect route. However the availability of a 30-minute service in both direction at the White Hart stops, which is

only just over 1 km distant from most of the proposed plots, means that, at least on return journeys, residents would have a half-hourly service available.

Route 233 passes the top of Downs Road, which is the largest concentration of employment in West Oxfordshire, about 2km from the site. As well as the bus service, the distances involved appear to make cycling a credible prospect. We note that the Downs Road area is actually further from the North Witney and East Witney Strategic Allocations than it is from this site. Furthermore, the cycling routes from this site routes are relatively flat.

As well as Witney, service 233 links directly with both Carterton and Burford each hour. As well as secondary education in both towns, Carterton in particular is also a significant employment centre. Across Witney the route also provides a relatively direct connection to the rail service at Hanborough Station, very close to following the most direct driving route.

Especially given the context of West Oxfordshire, it is apparent that the level of public transport provision is somewhat better than might be expected, and offers a range of relatively credible travel choices that go beyond car use.

The level of service directly to and from the site is actually under-estimated by the Transport Assessment. The direct Witney – Burford branch of the 233 runs directly past the site frontage in each direction every hour, as well as the other branch serving Brize Norton Road.

However, the 853 service no longer runs past the site. This has been incorporated into the S2 service and runs along the A40 Witney Bypass between Burford and Witney. Towards Cheltenham, it would be possible to connect at Burford, where S2 now provides 7 trips each way to Cheltenham per day rather than the 3 offered by 853.

3. Location and Provision of bus stops

Given that an hourly service in fact runs along the site frontage, it is quite appropriate to seek to maximise the accessibility and quality of bus stop infrastructure.

A single eastbound stop exists at the Horse and Radish public house; it is not clear that there is a westbound reciprocal. This is very close to the north east corner of the current Bovis site, and benefits from a direct pedestrian access through the northern part of the existing development very close to completion. Pedestrian connections marked as (2) on the Indicative Master Plan would permit direct and legible pedestrian access to this stop. It would make sense to make proper stop provision in both directions at the Horse and Radish, or the near vicinity and we understand that funding for this purpose was secured from the existing development.

Additionally, a pair of unmarked stops exists at the north west corner of the site at White Hall Cottages. These are the nearest stops for the bulk of the proposed development. We would therefore urge that direct pedestrian provision is made to the Burford Road to these stops, which should be formalised. This should at the least involve a pedestrian crossing refuge and hardstanding, and this might involve moving the stops to a certain extent. It is likely such stops would need to be sited east of any extension of the 40mph speed limit along the site frontage.

This provision is essential to meet the requirements of NPPF, specifically:

- opportunities to promote walking, cycling and public transport use are identified and pursued (para 104 c);

- patterns of movement, streets, parking and other transport considerations are integral to the design of schemes (para 104 e);
- give priority first to pedestrian and cycle movements, both within the scheme and with neighbouring areas; and second – so far as possible – to facilitating access to high quality public transport, with layouts that maximise the catchment area for bus or other public transport services, and appropriate facilities that encourage public transport use (para 112 a).

The adopted Local Plan 2031 has broadly similar policies and the recently adopted County Local Transport and Connectivity Plan 2040 has even more ambitious policies, including an overarching objective to reduce car journeys in the County by 25% by 2030. Achieving a substantial reduction in car dependency and a very great increase in active travel and public transport use is a key measure demanded by Government to support the legally-binding commitment to securing net-zero greenhouse gas emissions by 2050.

We additionally note and welcome the proposed direct pedestrian link to the east, through the current Bovis development and across the Ripley Avenue open space to Brize Norton Road, and the bus stops there, which will be better surveilled, and might well be preferred by some residents despite being a little further distant. It is more likely still that this link will be used by residents returning from Witney on Carterton-bound buses.

4. Conclusion

We note that this site is being promoted to address a deficit in the housing trajectory and provide much needed new homes, 40% of which will be affordable tenures.

We trust the foregoing provides important clarification on the public transport service at the site and in the village.

We urge that the proposals take necessary and appropriate steps to ensure that if consented, residents would be able to safely and conveniently access these services.

Yours sincerely

Nick Small

Head of Strategic Development and the Built Environment
